**WHEREAS**, pursuant to Texas Local Government Code Section 51.001, the City has general authority to amend an ordinance that is for good government and order of the City; and

**WHEREAS**, the City Council finds that addressing minimum lot size requirements for residencies that connect to state controlled wastewater connections and governing the planning, design, and construction of subdivisions within city's jurisdiction is for good government and order of the City ; and

**WHEREAS**, the City Council further finds that amending the City Code to provide for additional measures to control and manage the quantity of impervious coverage surfaces through minimum building and lot size requirements within subdivisions is for good government and order of the City; and

**WHEREAS**, the City Council finds that the ability of the City to ensure public health and safety by the monitoring of existing and proposed street systems – specifically their ability to handle increases in traffic generated, availability of water and wastewater service, capability of providing adequate fire protection, and provision of off-street parking facilities for new subdivisions by setting reasonable limits on the number and density of new residencies is for good government and order of the City; and

**WHEREAS**, the City Council finds that the City has a duty to protect degradation and pollution of ground-water resources-specifically aquifer protection and supply, and the need to manage drainage and the intensity and directional flow of storm water runoff and that this oversight is good for government.
